

Do you want to have an auction that takes place at your event?

No

Yes

Online Auction

You will have your own auction website and start raising funds for your cause

The cost is 5% of your highest bids (revenue). If you generate \$1000 from your online auction, BiddingOwl will charge \$50 to your credit card

Mobile Bidding

I want bidding to take place on smartphones, ipads and computers.

So you like to have online/mobile bidding at your event? And your guests should be able to bid from their smart phone and via volunteers from Bidding Stations?

The cost is 5% of your highest bids (revenue). If you generate \$1000 from your online auction, BiddingOwl will charge \$50 to your credit card

Paper Bid Sheets

I want a traditional auction with Paper Bid Sheet and maybe an Auctioneer

Great! You may use the program for FREE. Print Bid Sheets, register bidders, invoice your bidders. Basically, you may use the entire system, EXCEPT for having people actually bid on the items ONLINE.

I want both

Mobile and Paper Bidding

I want both; an online auction before the event and paper bid sheets at my event. We call this Pre-Bidding.

You will be able to carry the highest online bids over to your live event. Our bid sheets will reflect the highest bidder and bid from online.

Please note: online/mobile bidding and paper bidding at the same time is not possible

We will charge 5% of the highest bids (revenue) placed on your online bids only.

For example Somebody placed a pre-bid on the item for \$50 online and another person actually bought the item at the actual event via a traditional paper bid-sheet for \$100. BiddingOwl will charge you \$2.50 based on the online bid of \$50.
