Alternative Payment Instructions

Use only for payments other than PayPal. Text will be displayed to bidders during online auction checkout. Instruct bidders on how to submit payment.

After login you should be directed to this page.  
If not, follow instructions at the end of  
presentation

## API Access

To set up PayPal on your website, you'll need to use API credentials or to grant API access to a third party via permissions. The API (Application Programming Interface) allows PayPal software to communicate with your online store or shopping cart.

### How is PayPal set up on your website?

#### Pre-built payment solution

You're using a third-party e-commerce solution, like Magento or Shopify, for shopping carts and online stores where the PayPal payment processor is built in.

- [Grant API permission](#)
- [Add or edit API permissions](#)

#### PayPal Checkout SDK integration

You or your developer integrated the Braintree v.zero SDK that allow you to accept payments via Paypal.

[Request SDK Credentials](#)

#### NVP/SOAP API integration

You or your developer integrated NVP/SOAP (or "Classic") APIs that allow you to accept payments via PayPal.

[Request API credentials](#)

### Accept payments from your online stores before setting up APIs

[Enable Express Checkout](#) to accept payments from your online stores right away. You can set up API permissions or credentials later.

Questions?

### Request API Credentials - Paypal

API credentials consist of three elements:

- An API username
- An API password
- Either an API signature or an API SSL client-side certificate

If you're registering a shopping cart or solution provider, you must provide an API signature or a certificate.

- Request API signature** if your shopping cart or solution provider has asked for an API username, password, and signature, or if you're developing a custom shopping cart.
- Request API certificate** if your shopping cart or solution provider requires a file-based certificate.

Need help deciding which credential is right for your needs? [Learn more](#)

Alternative Payment Instructions

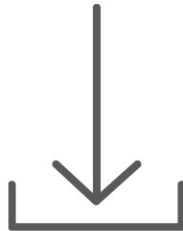

Use only for payments other than PayPal. Text will be displayed to bidders during online auction checkout. Instruct bidders on how to submit payment.

**Congratulations!**  
You are now able to accept payments  
from your Bidders

**Your bidders will be able to checkout on their own, just like they would on Ebay, Amazon, Zappos, or any other online Retailer**

**If you are not  
initially directed  
to the NVP/Soap  
page, follow  
these directions**

The screenshot shows the PayPal dashboard interface. At the top, there is a navigation bar with the PayPal logo, a 'Summary' link, and several menu items: 'Money', 'Activity', 'Reports', 'Tools', and 'More'. The 'Tools' dropdown menu is open, listing options: 'Business Setup', 'Invoicing', 'Request Money', 'Resolution Center', 'Send Money', and 'All Tools'. A red arrow points to the 'All Tools' option. On the left side of the dashboard, there are two main sections: 'Money' showing an available balance of \$24.65 USD, and 'Invoicing' with a 'Create Invoice' button. On the right, there is a 'Receivables' section with a 'More >' link and a message stating 'There are no transactions for the last 30 days.' In the top right corner, there are icons for notifications, a profile, and a 'Log out' button.

# PayPal API

Find API credentials on the right hand side

The screenshot shows the PayPal dashboard with a navigation bar at the top containing the PayPal logo, 'Summary', 'Money', 'Activity', 'Reports', 'Tools', and 'More'. On the right side of the navigation bar are a notification bell, a profile icon, and a 'Log out' button. The main content area is a grid of cards:

- PayPal debit card**: Use a debit card conveniently linked to your PayPal account. Includes a 'Learn more' link.
- Promote financing**: Boost sales by offering customers no-interest financing. Includes an 'Open' button and a heart icon.
- Cross-border trade**: Get information, tools, and tips to expand your international sales. Includes an 'Open' button and a heart icon.
- Multi-order shipping**: Print, ship, and track packages faster. Manage and track shipments in one location. Includes an 'Open' button and a heart icon.
- Shipping calculator**: Create domestic and international shipping methods to offer your customers during checkout. Includes an 'Open' button and a heart icon.
- Tax calculator**: Set up sales tax rates for each U.S. state or for international orders. Includes an 'Open' button and a heart icon.
- Fraud filters**: Set up filters to identify potentially fraudulent activity on incoming payments. Includes an 'Open' button and a heart icon.
- API credentials**: Request API credentials and grant API permissions to third parties. This card is highlighted in light blue and has a red arrow pointing to it. It includes an 'Open' button and a heart icon.
- Developer site**: Represented by a code icon.
- Business Resource Center**: Represented by a lightbulb icon.
- PayPal Logo Center**: Represented by the PayPal logo icon.
