

Payment Checkout Options

PayPal

This is the ONLY way we integrate payment processing. All you need is a simple PayPal account. Setup is easy. This integration will allow your online bidders to checkout on their own. Please note: This will NOT capture credit cards BEFORE the sale. Bidders will have to go through checkout after the sale.

Manual

This is the best option for live events with no online bidding (also no pre-bidding). You are in control on how you would like to take payment. Cash, Check, Credit Card. You are able to pull up the invoices and mark them manually as paid (this marks items and bidders as paid). Credit Card payment will be handled by you.
